CURTIS FERDINAND

DATA ANALYST | Excel · SQL · Python · Power BI | Watford, Hertfordshire | Remote / Hybrid

DATA SERVICES

Excel / CSV cleaning and validation • Duplicate and missing-value checks • Spreadsheet consolidation • SQL analysis and reconciliation • Python/pandas data preparation • Power BI dashboards and KPI reporting

SELECTED PORTFOLIO PROJECTS

Healthcare appointments | Data cleaning and SQL | View GitHub project
Simulated 1,000-record appointment dataset: standardised dates and fields, flagged missing values and repeated IDs, and queried cleaned data with SQLite.

Building permits | Public-sector-style data analysis | View GitHub project
Prepared and analysed 198,900 San Francisco building-permit records using Python/pandas; documented validation, derived fields and reporting outputs.

CRM campaign analytics | SQL and data quality | View GitHub project
Built a small synthetic relational CRM dataset with SQL joins, campaign metrics, opt-out checks, data-quality findings and Power BI reporting examples.

FIFA 2026 dashboard | Power BI and Python | View GitHub project
Developed an end-to-end portfolio dashboard using Python cleaning, Power Query, a relational data model, DAX measures and interactive visualisations.

TOOLS & TRAINING

Tools: Excel, Power Query, Power BI Desktop, DAX, SQL / SQLite, Python, pandas, VS Code and GitHub.
Training: IBM Data Analyst coursework and Microsoft Power BI Data Analyst training.

ENGAGEMENT & CONTACT

Available for temporary, fixed-term, contract and scoped freelance data assignments. Open to NHS, local government and commercial reporting work.

Portfolio: github.com/curtisf157-star
Location: Watford, Hertfordshire, UK | Working preference: Remote / hybrid

Projects are independent portfolio exercises using public or simulated data; they are not presented as paid NHS or council engagements.
